MARINA BUMPER MOUNTING INSTRUCTIONS

The **MARINA BUMPER** is easily mounted to the marina / floating dock by use of the 2 aluminum rails and stainless steel screws that are supplied with the product. Should the material to which the **MARINA BUMPER** shall be mounted not be suitable for screws, one may (for example) first mount a (preferably preserved) wooden board to the marina / floating dock and then mount the **MARINA BUMPER** to that board. (You may want to contact your harbor master for advice!) If needed, several **MARINA BUMPER** can be mounted side by side.

MARINA BUMPER MONTERINGSANVISNING

MARINA BUMPER festes ved å bruke de 2 medfølgende aluminiumskinnene og skruene i syrefast stål. Dersom skruene ikke passer/egner seg der **MARINA BUMPER** skal monteres, anbefales det å først feste et trykkimpregnert bord til bryggen. **MARINA BUMPER** festes deretter som vist over. (Ta kontakt med din havnesjef får råd!) Flere **MARINA BUMPER** kan med fordel monteres kant-i-kant der det er behov for det.
